LINEN

LINEN is a line of trolleys designed and built specifically for the collection of dirty linen which can be also used for waste collection.

LINEN is ideally suited in healthcare sector thanks to the Rilsan treated metal frame (or stainless steel on request) or in the hospitality industry and community.

The main characteristic is the modularity: each trolley, mounted on 4 rubber wheels Ø 80 mm. (nylon fork) and bumpers, is complete with a foot operated mechanism to open the lid for maximum hygiene and can be easily coupled to another equal with 2 screws, to form combinations suited to meet any collection need.

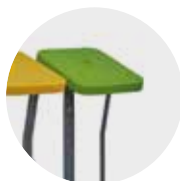

The cover, as the bag (capacity 70 lt., in plastic canvas or polyester for washing) resting on polypropylene plate for maximum stability, is available in different colors.
